Statement of Work :

During our meeting with the client 2 problems were mentioned :

- **SOW1:** To develop an Offsite Backup System for Unix Servers Running MFG Pro 7.4 , Progress 7.3e , Sco Unix 5.0.7 on an external device (e.g. Tape Drive)

- **SOW2 :** To create a Central Server based in Mumbai for Multiple Locations

----

Proposed Solution:

SOW1 :
1. Develop Unix Script for Mirroring of Disk on an External Medium Preferably on Tape Drive.
2. Mirroring of Database Backup
3. Creation of Compression and Archives
4. Creation of Datewise Backup Folders
5. Automation of Archiving Process
6. Automation of Mirroring Processing

SOW2 :

1. Create Virtual machines (Using Server Virtualization)
2. Replicate the Other Location Server environments on virtual servers
3. Replicate the data and applications on the virtual server environments.

SLA :
An annual maintenence contract and a Service Level Agreement will be sent in a Separate Document .

Time Involved :

SOW1 : 15 Working Days

SOW2 : 25 Working Days

Cost Involved :

Item	Cost
SOW1	₹ 40,000
SOW2	₹ 60,000
Total:	₹ 1,00,000

Terms and Conditions

- **Time Line Does Not include Public Holidays and Calendar Holidays**
- **Impact of Holidays on timelines will be discussed upfront**
- **50 % Advance Payment**
- **Remaining Milestone Based Payments**
- **1 Month Free Support Provided**
- **Does Not include any Hardware Cost.**
- **Anything Extra Other than this will cost extra.**
